

Vatican City

By Brother Gabriel

You've been fighting in this world war
Angels and demons knocking at your door
Wondering, wishing, waiting for that day
When you'll be free from all the world's pain

Fences built for protection, keep the bad outside, you're locked within
Come with me to Vatican City, we'll find the key, to set you free

Keep your head up, don't look down on yourself
Within your spirit lie great riches and wealth
One step closer, don't look back
Freedom's for fighters and for those who will act

Fences built for protection, keep the bad outside, you're locked within
Come with me to Vatican City, we'll find the key, to set you free

Let there be light inside your soul, an outburst in the night
To earn a perfect halo, come with a spirit contrite

You've been fighting in this world war
Angels and demons knocking at your door
Wondering, wishing, waiting for that day
When you'll be free from all the world's pain
