

Tetris

By Brother Gabriel

Feel myself falling like Tetris
Let gravity work out the metrics
Tell time not to rush it'd be best if
The end was spelled out by kinetics

To fight or to flee that is the question
Electric signals in my brain unlock expression
Cloud of chemicals been causing tension
Jumping hurdles that are blocking my progression

Ah, Ah

What is the purpose? What's the significance?
Can this life be defined as a coincidence?
Put together all of the pieces like a puzzle
Organize all of the cards that have been shuffled

Does it require a mind like Galileo?
Is there life in the heavens, will we ever know?
Simple science, basic arithmetic, greatest equation
To think and feel is to exist

Ah, Ah

Feel myself falling like Tetris
Let gravity work out the metrics
Tell time not to rush it'd be best if
The end was spelled out by kinetics

To fight or to flee that is the question
Electric signals in my brain unlock expression
Cloud of chemicals been causing tension
Jumping hurdles that are blocking my progression

Ah, Ah

Ah, Ah
